Acknowledgements

It is a great pleasure to acknowledge and thank the many colleagues, advisors, friends, and institutions who have helped make this book possible. My first thanks must go to the many advisors who helped me conceive and shape my dissertation at the University of California at Berkeley, which formed the basis of this book. Jacqueline Jung sparked my interest in the medieval body in several seminars, and encouraged me to pursue this unusual topic. She was also a critical voice in shaping the project's scope and ideas. Whitney Davis introduced me to a number of new frameworks for investigating my material, and provided insightful and constructive feedback at every turn. Beate Fricke helped me revise the study, and was exceptionally generous in sharing her vast knowledge of medieval primary sources and contemporary methodologies. My two other committee members, Elizabeth Honig and Thomas Laqueur, each inspired my thinking with the creativity of their scholarship and teaching, and I am grateful for their support of the project. I also want to make a special acknowledgement of Nina Rowe, my first advisor in medieval art as an undergraduate at Middlebury College. Nina's passion for her subject and exacting standards are what set me on the path to this book, and her continued friendship and advice are always a great source of motivation.

I am grateful to Jeffrey Hamburger, series editor for *Text Image Context*, for his support of the project as it made its way from dissertation to book. His comments greatly shaped the direction the study took, and his generous feedback was much appreciated. I am also indebted to the three anonymous readers chosen by the press, whose valuable and constructive suggestions changed the project on every level. The editorial staff of the Pontifical Institute of Mediaeval Studies, led by Fred Unwalla, was supportive of the project from the beginning, and I owe them a great debt for their expertise. They have offered helpful suggestions, worked tirelessly to edit the text and notes, and remained patient with my inexperience in this complicated process. Many thanks also to Nate Dorward, for his imaginative book design and also for the hard work necessary in creating such a beautiful volume.

Many institutions have supported my research financially. Many thanks to the Samuel H. Kress Foundation, the History of Art Departments at the University of California at Berkeley and Ohio State University, the Townsend Center for the Humanities

at Berkeley, the Kunsthistorisches Institut in Florence, and the International Center of Medieval Art. Two grants from the College Art Association provided assistance for the purchasing of images and subsidized the cost of production. Thanks also to the many libraries that provided access and images, particularly the Biblioteca Apostolica Vaticana, the British Library, and the Bibliothèque nationale de France.

Most of all, this research has been shaped and supported by the voices of my friends and colleagues. I would like to especially thank three friends who helped me grapple with Opicinus (and art history) over countless conversations: Elizabeth Ferrell, Aaron Hyman, and Jenny Sakai. Other friends and colleagues who have generously listened to and shared ideas include Christopher Atwood, Meryl Bailey, Elizabeth Bennett, Jennifer Borland, Chad Corbley, Paul Doyle, Martha Easton, Molly Farrell, Lisa Florman, Robert Flynt, Elizabeth Gand, Eliza Garrison, Aglaya Glebova, Amanda Gluibizzi, Barbara Haeger, Luke Habberstad, Jacob Haubenreich, Christian Kleinbub, Christopher Lakey, Sherry Lindquist, Vanessa Lyon, Victoria Morse, Kris Paulsen, Mike Potoczniak, Elizabeth Quarles, George Rush, Andrew Shelton, Jennifer Shurville, and Christine Trychin. Many thanks also to my family for their love and encouragement: Nancy, Dale and Leah, and also Sallie, Charlie, Nate, Hannah, and especially my partner Adam have helped me in innumerable ways, both personal and professional, for many years.

Finally, I want to briefly acknowledge the two people to whom this book is dedicated. I never met Michael Camille, but his writings have always been, and continue to be, my greatest source of inspiration as a scholar. It was in his short essay “The Image and the Self” that I first encountered the strange drawings explored in this book. His appreciation of the marvellous and strange, but also his insistence that such objects lie at the centre of our understandings of medieval culture and representation, have guided nearly every project I have worked on. I hope that he would have liked this book. Opicinus de Canistris inspired me in different ways, in turn confusing me, offending me, and delighting me, but always making my mind race with his daring creativity. His work typifies everything that I love about medieval art – most particularly, the sense that I will never fully understand it. To work on an artist for so many years and remain surprised and engaged by him at every turn has been a true pleasure. If Opicinus was crazy, I don’t want to be sane.
